

Lecture 5: Tuple (Q1–Q15)

Q1

Task: Create a tuple with roll number, name, and CGPA and print it.

Demo Input:

101 Palika 9.1

Demo Output:

(101, 'Palika', 9.1)

Q2

Task: Input 6 integers, store in a tuple, print reverse using slicing.

Demo Input:

1 2 3 4 5 6

Demo Output:

(6, 5, 4, 3, 2, 1)

Q3

Task: Print all elements except first and last.

Given: t = (10, 20, 30, 40, 50, 60)

Demo Output:

(20, 30, 40, 50)

Q4

Task: Join two tuples.

Demo Input:

(1, 2, 3)

(4, 5)

Demo Output:

(1, 2, 3, 4, 5)

Q5

Task: Repeat tuple (1,3,5) three times.

Demo Output:

(1, 3, 5, 1, 3, 5, 1, 3, 5)

Q6

Task: Check membership in tuple.

Demo Input:

15

Demo Output:

True

Q7

Task: Count occurrences of a value.

Demo Input:

Tuple: 1 2 3 2 4 2

Value: 2

Demo Output:

3

Q8

Task: Find index of a number in tuple.

Demo Input:

Tuple: 5 10 15 20

Value: 15

Demo Output:

2

Q9

Task: Print max and min of tuple.

Demo Input:

8 3 9 1 6

Demo Output:

Max = 9

Min = 1

Q10

Task: Print sum of tuple elements.

Demo Input:

2 4 6 8

Demo Output:

20

Q11

Task: Convert string to tuple and print line by line.

Demo Input:

COMPUTER

Demo Output:

('C', 'O', 'M', 'P', 'U', 'T', 'E', 'R')

Q12

Task: Convert list to tuple and print type.

Demo Output:

(11, 22, 33, 44)

<class 'tuple'>

Q13

Task: Sort a tuple.

Demo Input:

9 3 7 1 5

Demo Output:

[1, 3, 5, 7, 9]

Q14

Task: Print length of tuple.

Demo Input:

10 20 30 40

Demo Output:

4

Q15

Task: Check if all elements are even.

Given: (2, 4, 6, 8, 10)

Demo Output:

True

◆ Lecture 6: String (Q16–Q30)

Q16

Task: Print first, middle, and last character.

Demo Input:

PYTHON

Demo Output:

First = P
Middle = T
Last = N

Q17

Task: Slice from index 1 to 5.

Demo Input:

PROGRAMMING

Demo Output:

ROGRA

Q18

Task: Reverse string using slicing.

Demo Input:

HELLO

Demo Output:

OLLEH

Q19

Task: Concatenate and repeat strings.

Demo Input:

Hi
There

Demo Output:

HiThere
HiThereHiThere

Q20

Task: Check character presence.

Demo Input:

String: python
Character: h

Demo Output:

True

Q21

Task: Find length of string.

Demo Input:

Computer

Demo Output:

8

Q22

Task: Convert to upper and lower case.

Demo Input:

PyThOn

Demo Output:

python

PYTHON

Q23

Task: Replace spaces with underscores.

Demo Input:

hello world python

Demo Output:

hello_world_python

Q24

Task: Replace first occurrence of a word.

Demo Input:

Java is fun and Java is powerful

Replace: Java → Python

Demo Output:

Python is fun and Java is powerful

Q25

Task: Split sentence into words.

Demo Input:

Python is easy to learn

Demo Output:

['Python', 'is', 'easy', 'to', 'learn']

Q26

Task: Split comma-separated string.

Demo Input:

red,green,blue

Demo Output:

['red', 'green', 'blue']

Q27

Task: Find position of word.

Given: "learning python is fun"

Demo Output:

9

Q28

Task: Check if string has only alphabets.

Demo Input:

Python

Demo Output:

True

Q29

Task: Check if string is numeric.

Demo Input:

12345

Demo Output:

True

Q30

Task: Check if string is title case.

Demo Input:

Python Programming

Demo Output:

True
